Research Payments System

(Rypaysystem)

The First and Main System for Research Payments in Universities

Abstract

The Universities needs a standard system that can be used in Research Payments, so the initial idea of designing a **Research Payments System (Rypaysystem)** was raised, and it is hoped that research centers and universities around the world can use this system for their Research Payments. The main goals of **Rypaysystem** is Presentation a **Research Payments System** internationally, Standardization of Research Payments and Integration of Research Payments.

\$RECOIN is the First and Main Token to be created in the field of **Research Payments System** in Universities and is known as the Digital Asset of **Repaysystem**. To promote Research Activities and Programs, **Repaysystem** has introduced this token on the Binance Smart Chain Blockchain Platform. **\$RECOIN** is a Research-Centered and Community-Centered Token and is a type of Bep 20 Token and is a token for **Research Services Payment**. This token was supply on June 2021 and in the number of 1 Quintillion. Demand for the use of Research, as well as the role that research plays in the development, this makes **\$RECOIN** Token valuable, because it serves both as a Digital Currencies and as a Distributed Role to develop and support of Research. We want to ensure that our Users and Researchers increase **\$RECOIN** credibility.

Keywords: Research, Payment, Services, System, \$RECOIN

1. Introduction

Research is one of the basic pillars of development and growth of a society. A developing society needs institutions that carry the culture of research in their paths. The relationship between sustainable development and the scientific and research structures of society has a close relationship through which valuable findings and theories can be used for national goals. The culture of research carries with it a kind of foresight. Recognition of scientific and research capacities can be effective in spreading and strengthening the culture of research. On the other hand, education and research will play an effective role in improving the performance of economic enterprises and increasing their income generation, and the government should use other strategies such as granting concessions and supporting enterprises that invest in research to other economic enterprises. Also encourage this important issue.

2. Problem Design (Initial idea)

Developed countries have an organic research system that shows a kind of continuous link between economic, social and cultural policies with research policies. In contrast, developing countries have a mosaic research system. And we see in these countries the lack of organic connection of these elements in the heart of the research system. In the development strategy of any society, the research and development strategy lies at its heart. If countries want to achieve economic and social development, it must properly understand the relationship between research systems and the socio-economic system and balance the process of comprehensive development of its society with careful and necessary planning.

Looking at research from three perspectives is important and has a special place:

Economic importance of research: According to experts, for every monetary unit invested in research, the equivalent of 30 units of profit is obtained, which can significantly contribute to the economies of countries and their GDP. **The role of research in the national security of countries:** The development and application of intelligent technologies in defense of the security and independence of countries is possible through research and development.

The role of research from a cultural perspective: Research is one of the growing and transcendent cultural origins and has an effective role in raising the culture of a society.

The issues that academic systems face in the field of research are related to their research services. Payment of consulting fees for research proposals, master's theses, doctoral dissertations, research projects, payment of consulting fees for designing questionnaires and research interviews, payment of consulting fees for statistical analysis, payment of consulting fees for writing research reports and articles, Payment of consulting fee Submission of oral research report in seminars and conferences, Payment of consulting fee for book printing and...

International research payments with PayPal are possible but limited. Accordingly, universities need a standard system that can be used in research payments, so the initial idea of designing a **Research Payments System (Repaysystem)** was raised, and it is hoped that research centers and universities around the world can use this system for their research payments.

3. Goals of Repaysystem

- Presentation a **Research Payments System** internationally.
- Standardization of Research Payments
- Integration of Research Payments

4. Definition of Concepts of Repaysystem

Research

Research is a smart, conscious, creative, and organized process to find, retell, and review phenomena, events, behaviors, and ideas. Research is a coherent and systematic effort to develop existing knowledge about the issues we are dealing with. In the field of crypto currency research is an attempt to find the best possible solutions to solve problems in their various fields. This research can be a coherent activity to achieve a clearer understanding of the concepts of Crypto Currencies.

Research Payments

The fee for conducting research services (publishing articles in research journals, lecturing at conferences, the fee to guide and advise on research projects and dissertations, membership in scientific databases, participation in scientific conferences, etc.) Academic and organizational researchers are awarded research fees.

5. Problem-Solving Strategies and Technical Solutions

Table 1 lists the research issues and problems in the field of **Research Payments System** with technical solutions and strategies for solving these problems.

Table 1: Problem-Solving Strategies and Technical Solutions

Research Issues and Problems	Problem-Solving Strategies and Technical Solutions
Payment for research grants to research	Research Payments System (Repaysystem)
Payment a subscription fee to subscribe to sites and download websites	
Payment to buy books from international fairs and book buying websites	
Payment for the annual subscription fee for scientific journals	
Payment of consulting fees for supervisors and consultants	
Payment for patents and innovations	
Payment for writing research proposals	
Payment for writing master's theses	
Payment for writing doctoral dissertations	
Payment for writing and implementing research projects of organizations	
Payment for participation in conferences, seminars and seminars	
Payment for the implementation of research projects	
Remuneration of supervisors, consultants, dissertation reviewers and dissertations	
Payment for judging magazines and publications	
Payment for refereeing fees at conferences	
Payment for the designs of innovators and innovators	
Payment the fee for writing and printing books	
Payment of valuable discoveries, inventions and works of art	
Payment of editorial fees, membership in the editorial board of publications, boards of the scientific association,	
Pay prizes for participating in festivals	
Payment for designing research questionnaires	
Pay to buy statistical analysis software	
Payment for statistical analysis of projects	
Payment for writing research reports	
Payment for writing scientific articles	
Payment for a patent	
Payment for training related to research and ...	

6. \$RECOIN

1-6- Definition and Nature of \$RECOIN

To promote Research Activities and Programs in Universities, **Research Payments System** has introduced a token on the Binance Smart Chain called **\$RECOIN**. **\$RECOIN** is a Research-Centered and Community-Centered Token and is a token for **Research Services Payment**. This token was supply on June 2021 and in the number Of 1 Quintillion. **\$RECOIN** is the first Token to be created in the field Research and is known as the Digital Asset of **Research Payments System**.

This token is a **Utility Token** and represents the assets of the **Research Payments System** and has a Currency Value Therefore, it can be considered a **Currency Token** This token is used as a method to pay and store value and is needed for Researchers, Students, Research Institutes, Universities, Technology Companies, Investors, etc. To access Research Services

This token can also be considered a type of **Valuable Token**. In addition to the fact that it can be used to purchase Research Services, it can also be expected to return on investment and profit by maintaining it and buying and selling it. Therefore, this token is known as a smart investment contract and has the potential to earn a profit and income. This token can be considered as an **Asset Token** and is known as a digital asset of **Research Payments System**.

This token can be used to encourage researchers to carry out research activities, so it can be considered a **Reward Token**.

Finally, the this token is a type of investment contract with passive income potential and can be used in various forms (earning profit by holding tokens, Staking, Investing or performing Mining operations, etc.) to make a profit. Therefore, it can be considered a **Dividend Token**.

Demand for the use of Research, as well as the role that research plays in the development, this makes **\$RECOIN** Token valuable, because it serves both as a Digital Currencies and as a Distributed Role to develop and support of Research. We want to ensure that our Users and Researchers increase **\$RECOIN** credibility.

2-6- Reasons for Making \$RECOIN

The first and most important reason for making this token is the lack of dedicated tokens for Research Payments. Some of the reasons for making this token are:

- **To pay and store value:** This token is needed for Researchers, Students, Research Institutes, Universities, Technology Companies, Investors, etc. To access Research Services about crypto currency.
- **To earn a profit and income** by holding tokens, Staking, Investing or performing Mining operations, etc.
- **To encourage researchers to carry out research activities.**
- A Token for Research Payments
- A Token for Research Services

3-6- Reasons for making \$RECOIN in Binance Smart Chain Network and its benefits

The Binance Smart Chain Network and product ecosystem enable development of high-performance Blockchain projects. An array of original features and protocols is designed to support speed, privacy, usability, and liquidity needs all in one platform.

Binance Smart Chain network is keen on building a decentralized consensus mechanism. The network structure, user assets, and intrinsic value will become more reliable with a higher degree of decentralization. Even so, Binance Smart Chain Network's consensus mechanism is much more energy-efficient compared with the Proof of Work mode.

Binance Smart Chain Network adopts a design with low calculation cost, making it easier for different apps on **Repaysystem** to expand its user base and be commercially competitive.

4-6- Current Applications of \$RECOIN

- Payment for research grants to research institutes and companies and knowledge base, professors, students and academics

- Payment a subscription fee to subscribe to sites and download websites
- Payment to buy books from international fairs and book buying websites
- Payment for the annual subscription fee for scientific journals
- Payment of consulting fees for supervisors and consultants
- Payment for patents and innovations
- Payment for writing research proposals, theses, dissertations and research reports
- Payment for writing and implementing research projects of organizations
- Payment for participation in conferences and seminars
- Payment for the implementation of research projects
- Remuneration of supervisors, consultants, dissertation reviewers and dissertations
- Payment for judging magazines and publications
- Payment for refereeing fees at conferences
- Payment for the designs of innovators and innovators
- Payment the fee for writing and printing books
- Payment of valuable discoveries, inventions and works of art
- Payment of editorial fees, membership in the editorial board of publications, boards of

the scientific association,

- Pay prizes for participating in festivals
- Payment for designing research questionnaires
- Pay to buy statistical analysis software
- Payment for statistical analysis of projects
- Payment for writing scientific articles
- Payment for training related to research and ...

5-6- \$RECOIN Smart Contract

Type: Bep 20

Contract: 0x933bb8d5847de083efd919e1422776463185416f

Name: Research Coin

Symbol: \$RECOIN

Creator: 0x5bb9a9c2d3741b69bfcda14962275e821a0ede04

Decimals: 2

Total Offer: 1 Quintillion

Maximum delivery: 1 Quintillion

6-6- The Basis of Calculating the Number of \$RECOIN

This token is the first token of Research Payments made in Binance Smart Chain, so the basis for calculating the number of \$RECOIN is the total number of main tokens in the Binance Smart Chain.

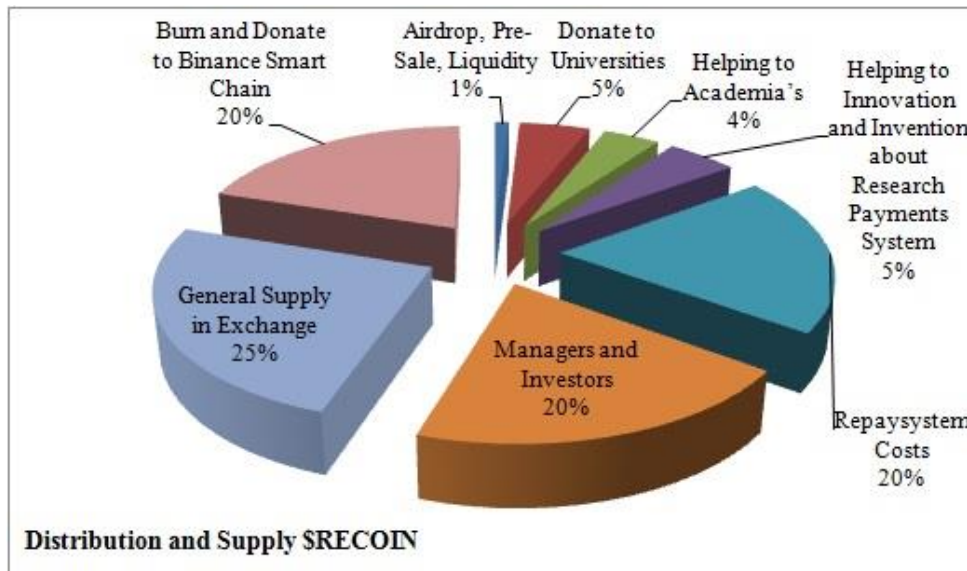

Given that Research is the focus of Development, so this number will allow you to have enough tokens to use of Research Services, Negotiate on trading platforms, provide liquidity and scale for future Research growth.

7-6- Distribution, Allocation and Supply of \$RECOIN

When we design **Research Payments System**, we wanted the \$RECOIN token, it would have as a nominal representation 1 \$RECOIN = 2.142857142857143e-12 BNB. With this in mind, a number of 1 Quintillion \$RECOIN was generated. This number allows Researchers, Academic and Investors to receive sufficient tokens to pay for research services and conduct research activities, as well as to provide the necessary liquidity for Research and Development.

Table 3: Distribution and Allocation and Supply of \$RECOIN

Set	Percentage	Period Time
Airdrop, Pre- Sale, Liquidity	%1	2021-2023
Donate to Universities	%5	2021-2023
Helping to Academia's	%4	2021-2023
Helping to Innovation and Invention about Research Payments System	%5	2021-2023
Repaysystem Costs	%20	2021-2023
Managers and Investors	%20	2021-2023
General Supply in Exchange	%25	2021-2023
Burn and Donate to Binance Smart Chain	%20	2021-2023
Total	1 Quintillion	-

8-6- The Basis of \$RECOIN Pricing

There is no set rule for how Digital Currencies are priced. In fact, no individual, company, institution or organization is responsible for determining the price of Digital Currencies. It is only market conditions and the buying and selling rates and transactions of Digital Currencies that determine their daily prices.

Although there is no set rule for Digital Currencies pricing, there are two rules for \$RECOIN Token pricing. In the discussion of Digital Currencies, intrinsic value is based on its true values, which include all the tangible and intangible aspects of a currency. This includes factors such as market demand for a product or service, the ability of the executive team to accomplish the project, the belief of project developers, and the implementation of quality code and evaluation of the amount of financial support provided through partnerships and investment mechanisms for project success.

Many Digital Currencies, especially ICOs, are just an idea, and until that idea becomes a reality, it is very subjective to assess its intrinsic value. It will be impossible to calculate the intrinsic value without evaluating the factors mentioned.

However, a \$RECOIN Token may be very cheap at the beginning of pricing, and we have only set it at a few cents.

\$RECOIN Pricing Basis: Due to the fact that this token was created in the Binance Smart Chain, so it's pricing has been calculated according to the tokens of Binance Smart Chain Network.

The target price of \$RECOIN Token is determine by the buyers and sellers of the \$RECOIN Token, but we hope that the price of the token will reach **.00005 \$BUSD** and Higher by the end of the project.

9-6- Effective Fundamental Factors in raising Prices

Fundamental Analysis has no general framework. Fundamental Factors Effective in raising Prices in \$RECOIN Token is:

1- Transaction Volume: One of the Fundamental Factors Effective in raising Prices in \$RECOIN Token is its Trading Volume. The higher the Volume, the more famous and popular the token has become. In principle, the Volume of Transactions indicates the amount of \$RECOIN Token sales in exchange offices. Transaction Volume means the amount of \$RECOIN Token traded per unit time.

2- Market Value: Another very important item in \$RECOIN fundamental analysis is the Market Value, which is expressed in \$BNB or \$USD or \$BUSD or \$ETH. Due to the fact that \$RECOIN Token are made for Research Payments, and since Research is a broad category, its number is considered relatively large to have more users. To calculate the market value of a token, the product of the token's current price multiplied by its current inventory is used.

3- Application: In digital currencies, it is necessary to pay attention to what the purpose of creating currencies was. Also, what is the use of that currency? You need to pay attention to this, especially when you want to keep the share. The most important use of the \$RECOIN is for Research Payments. Given the breadth of research activities worldwide and the standardization of research methodologies, that \$RECOIN Token can be the basis for Research Payments worldwide.

4- Partner of universities and researchers in using of Research Payments System: This factor can play an effective role in increasing token price. Whenever universities partner with the **Research Payments System**, it can be an incentive for buyers to raise prices.

5-Realization and Completion of Repaysystem programs: Printing Books, Articles, Projects, Thesis and Dissertation related to **Research Payments System**, Credit Cards (Gifts and Research Payments), Conferences and Seminars.

6- Establish a Research Methodology Academy: Establishment of an international Research Methodology Academy can be a key factor in advancing the **Repaysystem** project and increasing token prices.

7- Publication of Scientific Journals about Research Methodology: Establishment and publication of scientific journals with international research rank in the field of Research Methodology can be an important fundamental factor in advancing the quality of the **Repaysystem** project and increasing token prices and **Repaysystem** project is expected to be able to establish and publish at least two journals.

8- Creation of Application Software, Wallet for Research Tokens, Decentralized Exchange for Research Tokens: Creating application software related to activities of **Repaysystem** project, creating a Wallet that can hold only the main tokens of BSC Network (Bep 2, Bep 20) and also creating a Decentralized Exchange(DEX) where only the main tokens of BSC Network with all the related tokens can be Innovative projects are complementary to the project and it can be an important fundamental factor for the development of the **Repaysystem** project and increasing token price.

10-6-\$RECOIN Target Market

\$REC Token Sponsors and Users, is consisting of:

- Researchers
- Universities
- Master's and Doctoral Students
- University Professors
- Research Institutes and Companies
- Knowledge-Based and Technology Companies
- Traders and Investors in Digital Currencies.

11-6-\$RECOIN Wallets

The most important wallets that support \$RECOIN is:

1		Trust Wallet	2		Via Wallet
3		Math Wallet	4		Token Pocket Wallet
5		Atomic Wallet (Coming Soon)			

12-6- Planning to listing \$RECOIN in Credible Exchanges

According to the announced schedule, \$RECOIN token is being listed in the following exchanges:

1		Pancakeswap	2		Biswap
3		HOTBIT	4		Coin Tiger
5		Coinex	6		BINANCE

13-6- \$RECOIN Financial Programs

Repaysystem has a variety of financial programs for this token, including:

1-Airdrop Program: Airdrop token will be presented in 3 rounds until the end of 2022.

2-Pre-Sale Program: After Airdrop tokens, the network intends to hand over 10 Quadrillion tokens at a price: **1 \$RECOIN = .0000000006 USD= 2.142857142857143e-12 BNB** through pre-sale to graduate students, researchers and investors. Due to the fact that the token has not been listed in any of the exchange offices yet, so a request form for purchasing the token has been placed on the network website and the applicants will receive their tokens after sending the required amount of token and the equivalent amount of BNB.

3- Initial Offering Program: After the pre-sale of tokens, the network intends to offer 10 Quadrillion tokens at the price of **1 \$RECOIN = .0000000006 USD= 2.142857142857143e-12 BNB** and through **Pancake Swap** the initial offer, while the amount of 10 BNB of liquidity will be allocated for the number of tokens.

4- Public Offering in Exchanges: After the initial public offering, the **Repaysystem** intends to offer the token in public at **Exchanges** so that buyers and sellers can trade the token.

5- Lottery Program: In this program, a number of Gift Credit Cards will be donated to Researchers, Universities and Investors through Lotteries.

7. How to use the Funds?

Given that the main purpose of the **Repaysystem** is Design a system for research payments. So how to use the funds (token sales) is as follows:

- Donate to Universities for doing Research.
- Helping to Researchers for doing Research.
- Helping to Innovation and Invention in **Repaysystem**.
- **Repaysystem** costs: Expenses related to printing Books, Articles, Project, Thesis and Dissertation related to Research, Credit Cards (Gifts and Research Payments), Smart Contracts, Conferences and Seminars, Application Software, Wallet.
- Establish a Research Methodology Academy
- Publication of Scientific Journals about Research Methodology.

8. Future Programs

- Establishment of **Repaysystem Academy**
- Establishment of **Repaysystem Researchers Network**
- Publication of **Journal of Research Methodology**
- Establishment of **RPSwap**
- Designing of **Research Credit Carts**
- Creation of **Rese Wallet**
- Making a special **Pose Machine for Research Payment Tokens**
- Establishment of **Repaysystem Exchange**
- Establishment of **ReseDex**

9. Privacy Policy

Your privacy is important to us. It is **Repaysystem** policy to respect your privacy regarding any information we may collect while operating our website. Accordingly, we have developed this privacy policy in order for you to understand how we collect, use, communicate, disclose and otherwise make use of personal information. Terms used in this Privacy Policy have the same meanings as in our Terms and Conditions. We have outlined our privacy policy below.

- We will collect personal information by lawful and fair means and, where appropriate, with the knowledge or consent of the individual concerned.
- Before or at the time of collecting personal information, we will identify the purposes for which information is being collected.
- We will collect and use personal information solely for fulfilling those purposes specified by us and for other ancillary purposes, unless we obtain the consent of the individual concerned or as required by law.
- Personal data should be relevant to the purposes for which it is to be used, and, to the extent necessary for those purposes, should be accurate, complete, and up-to-date.
- We will protect personal information by using reasonable security safeguards against loss or theft, as well as unauthorized access, disclosure, copying, use or modification
- We will make readily available to customers information about our policies and practices relating to the management of personal information.
- We will only retain personal information for as long as necessary for the fulfillment of those purposes.

We are committed to conducting our business in accordance with these principles in order to ensure that the confidentiality of personal information is protected and maintained. **Repaysystem** may change this privacy policy from time to time at **Repaysystem** sole discretion. By using this website you are agreeing to be bound by the then current version of these terms of service.

10. Disclaimer

We work hard to keep all the data on <https://recoins.io/> up to date and accurate, but please take notice of this disclaimer.

The materials **Repaysystem** website is provided on an 'as is' basis. **Repaysystem** makes no warranties, expressed or implied, and hereby disclaims and negates all other warranties including, without limitation, implied warranties or conditions of merchantability, fitness for a particular purpose, or non-infringement of intellectual property or other violation of rights.

11.Warning and Notification

~ Creating tokens on the TRON Network is not a difficult task, so there is a risk of fraud and selling worthless tokens to you.

~ The Digital Currency Market is so large that there is room for all currencies and tokens. Instead of replacing currency, our token is trying to find its true place, and that is because of the role that research plays in the development and advancement of digital currencies.

~ Our token will definitely reach **.00005 \$BUSD. \$RECOIN** Token is only made for researchers to invest in, if you do not have a good understanding of Scientific Research, do not invest in it. **\$RECOIN** Token is made for Researchers' Research Payments. If you do not believe in research and its role in development and progress, drop **\$RECOIN**.

~ If you think you can make money overnight with **\$RECOIN**, you are sorely mistaken.

With all this, we want to be one of the best in the digital currency market. We intend to establish the largest research network in digital currencies.

12.Development Team

Repaysystem Team is an integral and important part of our project. Most of the development team consists of research consultants, university professors, programming technical consultants and financial advisors, and according to the resume, the team members have joined our project. We plan to explain in the future about the expertise of our team members and how they affect our project. Also make the email of consultants available to communicate with other researchers, because they are important to our project and the project will work with these people.

14.Roadmap

15. Conclusion

Research is the Basis of the Development. Societies needs to Research for develop their programs. The main goals of **Repaysystem** is Presentation a **Research Payments System** internationally, Standardization of Research Payments and Integration of Research Payments. **Research Payments System (Repaysystem)** has introduced a token on the Binance Smart Chain Network platform called **\$RECOIN**.

\$RECOIN is Digital Asset of **Research Payments System (Repaysystem)**. **\$RECOIN** is a Community-Centered and Research -Centered Token, This token is a Utility, Currency, Valuable, Asset, Reward and Dividend Token.

When we design **Research Payments System (Repaysystem)**, we wanted the **\$RECOIN**, it would have as a nominal representation $1 \text{ \$RECOIN} = 2.142857142857143e-12 \text{ BNB}$. With this in mind, number of **\$RECOIN** was generated. Trust Wallet, Token Pocket Wallet and Via Wallet is the most important wallets that can hold **\$RECOIN**.

Research Payments System (Repaysystem) has a variety of financial programs for this token, including: Airdrop, Pre-Sale, Initial Offering, and Public Offering in Exchanges. **Repaysystem** Future Programs are: Establishment of **RPSwap**, Designing of **Credit Carts**, Creation of **Wallet**, Making a special **Pose Machine for Research Payment Token**, Establishment of **Exchange**, Establishment of **Dex**.

We hope that the token can be used in the following cases: Payment of research grants to research institutes and companies and knowledge-based, Payment of sites and websites subscription to download articles, Researchers' fees, Payment for writing research proposals and projects, Payment the annual subscription fee for magazines and Payment to buy books at international fairs.
